

AKINYEMI JESUTOBILOLUWA GABRIEL

Computer Science Graduate • Software Engineering

Lagos, Nigeria | +234 813 572 5784 / +234 812 372 5629 | jesutobi14@gmail.com | [linkedin.com/in/jesutobiloluwa-akinyemi-188976274](https://www.linkedin.com/in/jesutobiloluwa-akinyemi-188976274)

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience across machine learning, game development, and full-stack web development. Built and deployed ML-driven applications, developed games from scratch unity. Completed a six-month IT internship spanning service desk, systems support, and enterprise networking. Seeking an entry-level Software Engineering or Machine Learning role to apply strong analytical thinking and a fast-learning mindset.

EDUCATION

Adeleke University, Ede, Osun State

Graduated: July 2026

Bachelor of Science in Computer Science — Second Class Upper

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Database Management Systems, Computer Networks, Software Engineering

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3
Frameworks & Libraries: React, Flask, Tailwind CSS, Bootstrap, Scikit-learn, Pandas, NumPy
Machine Learning: NLP, TF-IDF Vectorization, Feature Engineering, Classification Models, Data Preprocessing
Databases & Tools: MySQL, SQLite, Git/GitHub, VS Code, Unity, Cisco Packet Tracer
Soft Skills: Problem-Solving, Teamwork, Communication, Time Management, Adaptability

PROJECTS

News Credibility Analyzer

Capstone Project

- **Built and deployed** an AI-powered web app to classify news articles as credible or fake, using Logistic Regression trained on TF-IDF vectorized text from the Kaggle Fake and Real News Dataset.
- **Designed the full pipeline** — text preprocessing, feature engineering, model training and evaluation — and connected it to a real-time prediction interface across frontend and backend.
- Collaborated in a two-person team under faculty supervision, managing scope, testing, and documentation.

AI Email Phishing Detection System

- **Developed** a machine learning system to classify phishing emails, applying text preprocessing, feature engineering, and model evaluation to improve detection accuracy.
- Built a Flask backend and integrated it with a user-facing interface for real-time classification.

Endless Runner Game

C#, Unity

- **Designed and built** an endless runner game from scratch, implementing core game mechanics, UI, and sound design.
- Conducted iterative testing and debugging to ensure smooth, responsive gameplay.

PDF File Converter

Java

- **Collaborated** with a team to build a Java tool converting PDF files into other formats — contributing core features, participating in code reviews, and joint debugging to improve reliability.

PROFESSIONAL EXPERIENCE

Industrial Trainee — CHI Limited

January 2025 – June 2025

- **Service Desk:** Logged and resolved IT support tickets, providing first-line technical support and escalating complex issues.
- **System Support:** Installed and configured operating systems and software; performed maintenance and resolved hardware/prINTER issues.
- **Networking:** Assisted with network troubleshooting, gaining hands-on exposure to enterprise networking infrastructure.

EXTRACURRICULAR ACTIVITIES

Member, Computer Science Club — Adeleke University

- Participated in workshops and seminars on emerging technologies and programming languages.
